Re: Record search results for the proposed Lake Merritt Station Area Plan planning area, City of Oakland, CA.

Dear Ms. Lindelof:

Per your request received by our office on 20 March 2012, a records search was conducted for the above referenced project by reviewing pertinent Northwest Information Center (NWIC) base maps that reference cultural resources records and reports, historic-period maps, and literature for Alameda County. Please note that use of the term cultural resources includes both archaeological resources and historical buildings and/or structures.

Review of this information indicates that there is record of 34 cultural resource studies that cover approximately 25% of the Lake Merritt Station Area Planning area. These studies consist of a mixture of architectural and archaeological studies and generally are concentrated around the Highway 880 corridor and around the periphery of Lake Merritt. Please refer to the attached bibliography to this report for a listing of these 34 reports.

The Lake Merritt Station Area Planning area contains six recorded archaeological resources: P-01-000026 (CA-ALA-5), a Native American habitation site; P-01-010520, historic-era residential remains located throughout a city block; P-01-010530, historic-era remains of a former rail line; P-01-010693 and P-01-010694, both of which are areas of shell and dark sand; and P-01-010796, a Native American burial. None of the archaeological sites are explicitly located within any of the opportunity sites; however, sites #15, 20, 21, 37, 38, 39, 43, 44 and 45 are located in close proximity to recorded archaeological resources.
The State Office of Historic Preservation Historic Property Directory (OHP HPD) (which includes listings of the California Register of Historical Resources, California State Historical Landmarks, California State Points of Historical Interest, and the National Register of Historic Places) lists 150 addresses that correlate to addresses within the Lake Merritt Station Planning area. Please note that additional addresses may be listed in the OHP HPD that are located within the Lake Merritt Station Area Planning area that are not included in this table below, as the addresses provided did not match addresses in the OHP HPD. Those addresses that are bold are either listed on the National Register and California Register or determined eligible for the National Register and listed on the California Register. Please see the table below for the addresses and current status code and attached to the report is a listing of the various status codes and their respective meanings.

In addition to the above listed addresses, the following districts are listed in the OHP HPD as including addresses within the Lake Merritt Station Area Planning area:

- Chinatown Commercial District (3S)
- Harrison Square (3S)
- Roger Coit Building Group District (3S)
- **Harrison and 15th Street Historic District (1S)**
- Landsing House and Bromewell Curtis District (3S)
- 10th & Oak Street District (7R)
- Lake Merritt District (3S)
- Lake Merritt Wild Duck Refuge (1S)
In addition to these inventories, the NWIC base maps show 30 recorded buildings or structures that have been recorded within the Lake Merritt Station Area Planning area:

At the time of Euroamerican contact the Native Americans that lived in the area were speakers of the Costanoan/Ohlole language, part of the Utian language family (Levy 1978:485). There are no Native American resources in or adjacent to the proposed project area referenced in the ethnographic literature. Milliken notes that the Huchiun occupied most of East Bay shore (1995:243).

Based on an evaluation of the environmental setting and features associated with known sites, Native American resources in this part of Alameda County have been found in close proximity to the former margin of the bay and its associated estuaries and marshlands, near sources of water (including perennial and intermittent streams and springs), and near other productive resource environments. The Lake Merritt Station Area Planning area is located adjacent to the marshlands and the estuary that predates Lake Merritt and contains relatively stable Holocene-age terrestrial landforms. In addition, the Lake Merritt Station Area Planning area also contains Middle Holocene-age buried land surfaces that have a significant potential of containing buried archaeological deposits that show no signs on the surface. Given the similarity of these environmental factors, there is a high potential of identifying unrecorded Native American resources, especially buried archaeological deposits, in the proposed Lake Merritt Station Area Planning area.

Review of historical literature and maps indicated the possibility of historic-period archaeological resources within the Lake Merritt Station Area Planning area. This area includes the original area platted for the city of Oakland that was incorporated in 1852. Archaeological investigations conducted for various projects along the Highway 880 corridor recovered significant historic-era archaeological materials in a similar urban environment to the Lake Merritt Station Planning area. With this in mind, there is a high potential of identifying unrecorded historic-period archaeological resources in the Lake Merritt Station Area Planning area.
RECOMMENDATIONS:

1) The purpose of a Lake Merritt Station Area Plan is to provide a planning document that will guide future development. Given the presence of known cultural resources and the likelihood of additional unrecorded cultural resources in the area, it is recommended that future projects be considered on an individual basis under the NWIC’s Project Review Program. This Program is organized to aid cities and counties in meeting their CEQA obligations during the initial study phase. These reviews result in project specific information and recommendations, and are completed in five working days. Please contact the NWIC Coordinator at 707/588-8455 for additional information.

2) As per Senate Bill 18 (Chapter 905, Statutes of 2004), local governments are required to consult with California Native American tribes prior to making certain planning decisions and to provide notice to tribes at certain key points in the planning process. These consultation and notice requirements apply to adoption and amendment of specific plans (defined in Government Code §65450 et seq.). Each time a local government considers a proposal to adopt a specific plan, they are required to contact the appropriate tribes identified by the Native American Heritage Commission.

3) There are 6 recorded archaeological resources in the Lake Merritt Station Area Planning area. It is recommended that prior to development within this area a professional archaeologist assess the resource(s) and provide project-specific recommendations if necessary. Please refer to the list of consultants who meet the Secretary of Interior’s Standards at http://www.chrisinfo.org.

4) There is a high possibility of identifying Native American archaeological resources and a high possibility of identifying historic-period archaeological resources in the project area. We recommend a qualified archaeologist conduct further archival and field study to identify cultural resources. It is further recommended that any development within the Lake Merritt Specific Plan include a good faith effort to identify any buried archaeological deposits. Field study may include, but is not limited to, pedestrian survey, hand auger sampling, shovel test units, or geoarchaeological analyses as well as other common methods used to identify the presence of archaeological resources. Please refer to the list of consultants who meet the Secretary of Interior’s Standards at http://www.chrisinfo.org.

5) The proposed project area contains over 150 recorded buildings, structures, and districts (several that are listed or determined eligible on the National Register and California Register) and likely numerous unrecorded buildings or structures; therefore, prior to commencement of project activities, it is recommended that the built environment assessed by a professional familiar with the architecture and history of Alameda County. Please refer to the list of consultants who meet the Secretary of Interior’s Standards at http://www.chrisinfo.org.
6) Review for possible historic-period buildings or structures has included only those sources listed in the attached bibliography and should not be considered comprehensive.

7) If archaeological resources are encountered during construction, work should be temporarily halted in the vicinity of the discovered materials and workers should avoid altering the materials and their context until a qualified professional archaeologist has evaluated the situation and provided appropriate recommendations. Project personnel should not collect cultural resources. Native American resources include chert or obsidian flakes, projectile points, mortars, and pestles; and dark friable soil containing shell and bone dietary debris, heat-affected rock, or human burials. Historic-period resources include stone or adobe foundations or walls; structures and remains with square nails; and refuse deposits or bottle dumps, often located in old wells or privies.

8) It is recommended that any identified cultural resources be recorded on DPR 523 historic resource recordation forms, available online from the Office of Historic Preservation’s website: http://ohp.parks.ca.gov/default.asp?page_id=1069

Thank you for using our services. Please contact this office if you have any questions, (707) 588-8455.

Sincerely,

[Signature]
