

OAKLAND FIRE DEPARTMENT'S RECORDS SUMMARY

On December 2, 2016, the Oakland Fire Department (OFD) received a call for a large building fire at 1351 31st Avenue. OFD received one emergency medical service (EMS) call related to the warehouse property on December 3, 2016. The Department has no responsive records of elective commercial inspections dating back to 2010.

For 1305 31st Avenue, OFD received three EMS calls in June and September 2015 and June 2016. The identifying information, i.e. name of the person seeking treatment has been redacted. From 2010 to present, the Department has no responsive records of elective commercial inspections.

For 1309 31st Avenue, the Department received one call for a fire located outside the building in 2014. There is one EMS call in 2015. From 2010 to present, OFD has no responsive records of elective commercial inspections.

For 1313 31st Avenue, the Department received three EMS calls in August 2005, April 2011 and June 2015. The Department has one record of a commercial inspection scheduled for February 25, 2016 with the inspector noting that the business was not in operation.

For 3071 International Boulevard, there are two records of commercial inspections for Airtech Communication on January 12, 2010 and March 7, 2012. The inspections were in compliance.

For 3073 International Boulevard, there are four records of commercial inspections pertaining to business entitled Griselda's Salon dated January 12, 2010 (non-compliant), March 18, 2010 (compliant), January 10, 2012 (compliant), and February 19, 2016 (facility closed). There is one record of a commercial inspection pertaining to the business entitled En Moda dated March 15, 2010 (compliant). There are three records of commercial inspections pertaining to the business entitled Fresas dated January 10, 2012 (compliant), February 19, 2016 (no access) and March 26, 2016 (no access). There are three records of commercial inspections pertaining to the business entitled Botanica MMM and Gift Shop dated July 11, 2011 (compliant), February 19, 2016 (no access), and March 26, 2016 (no access). There are three records of commercial inspections pertaining to the business operated by Airtech Communication dated January 12, 2010 (compliant), March 7, 2012 (compliant), and February 19, 2016 (compliant).

Narrative Name E29
Narrative Type Incident
Narrative Date 04:06:25 Saturday, December 3, 2016
Author 11550 - Paraskevopoulos, Damien D
Author Rank LT
Author Assignment 1
Narrative Text Engine 29 arrived on the second alarm and was initially assigned to the Charlie side to set up for Stang Gun operations. E12 provided a 4" and 3" lead to E29. Forcible entry to D1 and D2 roll-up doors. Both FF assisted with removal of 40' on A side that was stuck in overhanging wires. Then returned to E29 to operate the Stang Gun from the Charlie side for the duration of the incident, applying water to the roof. Delivered approx 950 GPM with 2" smooth bore tip on Stang Gun.

Narrative Name Engine 18
Narrative Type Incident
Narrative Date 04:26:04 Saturday, December 3, 2016
Author 17791 - Hughes, Michael
Author Rank LT
Author Assignment 1
Narrative Text Engine 18 responded and were assigned to division alpha upon our arrival. We stood by and assisted engine 17 with stretching a 2.5" handline to the first floor. Once the incident tactics changed to defensive we then manned 2.5" exterior hoselines. Later in the incident we assisted with fire attack in delta 1 exposure. After that assignment was complete we were released and returned to service.

E13 responded on the still and upon opening the apparatus bay saw smoke coming from a

Narratives

warehouse on the next block. E13 arrived on scene approx 60 seconds after the initial call to find 2 story warehouse with heavy black smoke pushing from the doors and windows. E13 established 31st Ave IC, Eng began to secure a water supply, Off + 2 FFs pulled 1.75" handline and went into fire attack/ search and rescue mode through the door on the Alpha side. Assigned Fire Attack Group Sup by B4 (IC). After advancing the hose line interior approx 40 feet and attempting to search and extinguish for about 30 minutes, I suggested to IC to begin defensive operations after it was clear that the 2 handlines interior (E13 1.75" and E4 2.5") were not putting out the fire. E13 exited the building to swap bottles at which time I did face-to-face with IC stating that the interior lines were not capable of extinguishing in a safe manner due to advanced fire, smoke conditions and tremendous fire load and I suggested that all crews go defensive after which we could reevaluate. After switch to defensive mode, reassigned to Div Alpha to assist with fire attack on Alpha and A/B sides using multiple 2.5" handlines. Assisted in fire attack on D1 and D2 exposure. Assisted in victim location on 1st and 2nd floor after fire was extinguished. Used 200' 4" supply line, 500' 2 1/2" handlines, 450' 1 3/4" handlines, 300' 1" reel line, 3 MSAs, 9 bottles, misc tools. Relieved on scene by C shift crew at approximately 0800 on 12/3/16.

Engine 16 arrived on scene on the second alarm. Joined the fire attack group and assisted with interior attack on the Alpha side of the building. Once the fire went defensive Engine 16 assisted in stretching a 2.5" line and helped with extinguishment of the fire on the Alpha and Brave side of the initial fire building. Engine 16 was later assigned to Division Alpha and assisted in stretching an 1 3/4 line into the Delta 2 exposure upstairs, helping to extinguish the fire and pulled ceilings.

Incident

08:57:19 Sunday, December 4, 2016

14577 - Mui, Frank

LT

1

Still received at approximately 2324 hours, Truck 2 responded on the still. Upon approaching 19th Ave and international I noticed that there was a significant smoke column in the general area of the reported structure fire. Upon approaching Derby and international I noted a type III, 2 story warehouse with heavy dark smoke on the

Narratives

Bravo/Charlie side of the fire building and difficult access. We decided to proceed to the Alpha side of the structure, and positioned the Truck in front of the Delta 1 exposure, for operations. I instructed the driver (Lee, C.), tiller (Suguitan, B.) and fifth FF (Keahey, J.) to ladder the Alpha side of the fire building using a ground ladder given overhead wires. The birddog (Tach, D.) and myself proceeded to perform forcible entry. The Alpha side of the structure had heavy dark smoke issuing from all openings. The Alpha side entry was already open, with the initial attack handline being set up. Proceeding to the Bravo side we found an open doorway approximately 30' along the Bravo wall. Noted that there was thick, heavy, black, roiling smoke emanating from the doorway. The birddog contacted a possible occupant while I continued along the Bravo side of the structure to locate other access points. Beyond the doorway was a large collection of debris and what appeared to be a mobile home trailer next to the building, in the Bravo/ Charlie corner. Flames were issuing from the first-floor windows of the Bravo/ Charlie corner of the building. I was unable to proceed to the Charlie side of the fire building due to a fence. I then rejoined my birddog by the Bravo access and the decision was made to rejoin the other members of Truck 2 to perform vertical ventilation.

The initial ground ladder deployed would have been towards the Alpha/ Bravo corner of the fire building, but in the process of attempting to negotiate the ladder below wires, the beam became entangled by a cleat on the power pole. After a few attempts to disentangle the ladder; it was abandoned, and we deployed another ground ladder towards the Alpha/ Bravo corner of the Delta 1 exposure building. I retrieved the TIC prior to going to the roof to recon conditions while the other members were gathering the equipment needed. Initial conditions on the roof of the fire building was heavy smoke drifting from the Bravo side of the building. The roof was a Tar and Gravel, peaked truss style roof, with a parapet, the decking was comprised of 1/2" x 6" planks. Sounding of the roof indicated that it was sturdy and stable. The initial hole was made close to the peak on the Delta side, towards the Alpha side of the building, approximately 6'x 6'. Heavy, dark, pressurized smoke issued from the hole when we punched through. The temperature indicator from the TIC were in the Red, and the image indicated high temps exiting the hole. The decision was made to Trench the entire Delta side of the peak. I was designated Vent group and had Truck 6 assigned to assist with ventilation efforts. Truck 6 started ventilation efforts from the Charlie side, working towards us. We established a trench of approximately 6' wide and 30' long along the peak of the Delta side. During the entire cutting operation, there was no visible flame, but the smoke issuing from the hole remained charged and temperature indicators remained in the red. It wasn't until approximately a couple of minutes after the hole was established, that fire starting to exit the hole starting from the Charlie side. At this point we withdrew to the Delta 1 roof. We were then instructed by OP's that we were switching to a defensive mode, and to set up the aerial for Ladder pipe operations.

The aerial operation was conducted using the 2" straight tip. Given the water supply we had from Engine 4, I requested an additional lead. Our initial flow was approximately 500 GPM @ 100 PSI. Upon receiving the second lead we increased our flow to approximately 770 GPM @ 150 psi. At one point, we had an issue with the waterway that required us to shut down operations until Shop 2 and the Truck Driver could resolve the issue.

Narratives

OP's requested that I keep an eye on the Delta 1 exposure building, and try to have our aerial operation concentrate on keeping lateral fire spread out of the exposure. Delta 1 and 2 was one large warehouse, that was separated by a partially finished wall that terminated prior to the ceiling. Delta 1 was being used as an automotive body repair shop with a paint booth in the rear portion. Delta 2 appeared to be unoccupied except for some light clutter. The entrances of Delta 1 and 2 were open already, and early into the defensive operation we had moderately dense trapped smoke issuing from both structures. The smoke conditions had started to clear during the course of defensive operations to the point where visibility was slightly hazy. Tic readings indicated that there were no temperatures above 85°F along the party wall between the fire building and the Delta exposure. Approximately 2-3 hours into the incident, Div. Charlie reported that they were seeing dark smoke issuing from the Bravo/ Charlie corner of the Delta 1 exposure. Op's requested that I recon the interior of the Delta exposure to see if I could locate the cause of the change in smoke conditions. Working my way back into the Delta 1 portion of the building I located a mezzanine like enclosed area along the Charlie side wall, with two windows, behind the paint booth. Fire was issuing from the window closest to the Bravo wall. OP's assigned Engine 4 to advance a hoseline into Delta 1 to attempt extinguishment. I attempted to locate access into the mezzanine area and determined that it may be accomplished from the Delta 2 portion of the building and relayed this information to OP's. I advised Op's that we still had our ground ladder in place and that we were able to assist with the ventilation of the Delta 1 exposure. We were assigned to ventilate the Delta 1 building. The roof of the Delta building was a rolled tar, Mansard Truss style roof with a parapet. Sounding of the roof indicated that it was sturdy and stable. The Deck was the same construction as the fire building. The roof was continuous, covering Delta 1, 2 and 3. There were skylights towards the Charlie and Delta sides of Delta 2. Our first hole was established over the area that Engine 4 was operating. Our second hole was established over the fire area; we also ventilated the skylights over Delta 2. Initially we had moderate smoke generating from our second hole and the skylights. Smoke conditions from the ventilation hole rapidly changed to fire while we were in the process of opening up the hole. We withdrew back towards the Alpha side of the roof. Once Fire Attack was able to gain access to the mezzanine, noted good steam conversion from the ventilation hole.

OP's requested that we assess conditions of the fire building and exposure; we noted a few hot spots in the fire building, a partial collapse of the Bravo/ Charlie corner of Delta 1 roof, and light wispy smoke from the ventilation hole of Delta 1. Through the smoke in the fire building, the Birdog, Driver and I were able to see what might have been 3 or 4 victims located on the un-collapsed portion of second floor. Op's requested that Truck 6 and Truck 2 officers report to the Alpha entrance with our TIC's, approximately 5-6 hours into the incident. Upon arrival At the Alpha side entry, OP's assigned the Truck 6 officer and Engine 15 officer to perform the initial search and report directly to him. I relayed the information of possible victim locations to the two officers prior to their entry into the structure. I proceeded back onto the Delta 1 roof. For the rest of the incident we used a 1 3/4" handline that was stretched to the roof of Delta 1 to knock down hot spots in the fire building from the roof of Delta 1 until relieved by on coming shift.

Used 5 SCBA's, 2 Chainsaws, and misc. handtools.

 Narrative Type Incident
 Narrative Date 02:44:01 Tuesday, December 6, 2016
 Author 3610 - Delgado, Kenneth
 Author Rank CPT
 Author Assignment 1
 Narrative Text E1, R1 were called to assist with demolition of parapet wall on the alpha side of structure. R-1 used misc hand tools, circ saw, chain saw, roto hammer and misc rescue harnesses and equipment to perform tasks. Crews from R1 and E1 were rotated and worked with contractor in crane basket to demo wall and secure integrity of building on the alpha side. Initial assignment was to cut away roof from exterior wall however the weight of roof material as it fell was jepodizing the structure. It was decided by the command staff to have R1, E1 assit contactor by cutting away the portion of the wall that was leaning in. R1 was advised three hours in to incident that heavy equipment was being brought in to assist and expidite parapet removal. Once parapet had been removed R1, E1 assisted contractor with removal of pianos on 2nd floor and cutting away steel roof beams to perform these tasks. R1, E1 were released from the scene by BC Lipp at approx. 0215 hours. There were

E 4 responded on first alarm. Spotted apparatus at Hydrant at 31st/International. Officer +2 proceeded to A side man door, assisted E17 in deploying 2 1/2" handline, donned SCBA, back up fire attack to E13, Fire attack grp, w/E17 & E 13. Proceeded into structure as far as we could, attempted aggressive interior attack in hi-heat and zero visibility conditions. Little to no effect. Meanwhile, pumper 4 assisted pumper 13 with an additional lead (200') from the Hydrant at 31st/Int'l.

After call to go defensive, Officer +2 exited building, ensured crew accountability, assisted in removing extension ladder from power pole near AB corner, assisted in deploying additional large caliber hand lines, assisted in supplying T2 ladder pipe, settled in on exterior application of water on A side through 1 3/4 hand line.

Eventually directed to reposition handline to interior rear of auto body shop (exposure D1) To keep fire from entering windows into bodyshop.

Afterwards, shut down operations, Nozzle FF4 and Lead off FF4 joined T2 for operations/observations from roof of exposure D1. Eventually told to take up and return to service. Did so at 0645 am.

Author Assignment 1
Narrative Text Assigned to Post-Fire Recovery assignment for 12/05/2016 from the hours of 0830-1930. E27 arrived to incident at 0830 with aircraft ramps from US&R warehouse. We placed the ramps at the B-side entry for heavy equipment. We were then assigned with ACFD to assist investigators with debris removal on C-side wall and A/B corner. Crew used miscellaneous hand tools and tarps.
At 1200, E27 was directed to decon & rehab before the next assignment. Chief Logan requested another Western Shelter & additional Tyvek suits. E27 met E17 at the US&R warehouse and loaded the tent into the MMRS vehicle. The tent was set up by 1530. E27 was requested to return to the warehouse for additional equipment: tent heaters & plans team cases. US&R Box Truck 2 was utilized for moving this equipment. E27 returned to service at approximately 1930.

12/06/2016: E27 assigned to Post-Fire Recovery. Requested to report at 0900. Assisted with debris removal until 1100 utilizing miscellaneous hand tools and buckets. Decon performed, crew rehabbed, & went back in service at 1120.

Narrative Text	<p>Battalion 4 arrived on scene and assumed 31st ave IC from engine 13 and immediately struck a second alarm. There were heavy smoke conditions upon. I assigned E13 E4 and E17 as fire attack group and advised them that 2 1/2 inch lines were necessary for this attack. Battalion 2 assumed DIV C and advised that she had heavy smoke conditions</p>

Narratives

coming but of the vents but no visible fire. A 2nd alarm was initiated T2 and T6 were assigned to vent group with T2 as the supervisor. T6 advised of heavy smoke and fire from the B side of the building. I confirmed that we had a well established fire in the B/C corner of the building. I assigned E 23 as the B exposure group with the tactical objective of not allowing all the debris that was piled up along the side of the building to catch on fire and advise if the fire gets established on the second floor. Fire attack group advised that the advancing of the 2 1/2 was tough and that the building was compartmentalized. I struck a 3rd alarm. I attached E20 to DIV B and made Battalion 3 DIV B. Fire attack group attempted to make progress into the main fire building for approx 20-22 min with limited progress and the fire became established on the second floor I advised all units on scene that we were changing strategy and going to a defensive attack. I took PAR of all units assigned to the Divisions and Groups and ensured that all firefighters were out of the building and out of the potential collapse zone of the A side parapet. T2 established a ladder pipe on the A/D side of the building and T6 had the D/C side with their ladder pipe. During the defensive operation on the main fire building we started to have a significant amount of smoke come from the D1 exposure, I assigned the Officer and Bird Dog of T6 to investigate. T6 found that the fire from the main building had transmitted into a common mezzanine. I Assigned E4, E12 and E16 along with T6 to stretch a line and extinguish the fire in the mezzanine. Those units were able to bring that extension of the fire under control quickly. The defensive operation continued for additional hours until the main bulk of the fire was knocked down. Once the ladder pipes were shut down I assigned E15 to do a quick search for victims. E15 was able to locate 9 confirmed fire victims 2 on the first floor and 7 on the second floor. I Advised DC White and Hoffmann. I was released from the incident at 0900.

E1/R1 (12/3/16)
 Incident
 21:17:20 Sunday, December 11, 2016
 11550 - Paraskevopoulos, Damien D
 LT
 1

E1/R1 was staffed with Lt Paraskevopoulos, Eng Flores, PM Fields, FF Halseth. We Responded twice during the day to this incident. See details below, all times are approx.

0900-1200 12/3/16

Responded to the incident as support members of the Technical Rescue Team. Eng Flores was the Technical Rescue qualified person. We worked with T1/R2 initially, assisting with shoring of the second floor, mazamine, near the front stairway. Our objective was to shore the second floor so that body recovery could be conducted on the second floor without a risk of collapse. We utilized Paratech Rescue struts. The actual shoring installation was performed by R2, we assisted with gathering equipment. We were under the direction of Captain John Farrell at all times.

1800-0130 (12/3/16-12/4/16)

We delivered 16 radios to DC White, per his request. Our assignment was to cut the concrete wall on the B side to facilitate opening a larger doorway for body recovery. We staged our equipment for approx 1.5 hours while public works removed debris from the B side lot. We assisted public works by manually removing some debris around the cars. Additionally we removed a large bush from the B side, along the wall. We utilized a chainsaw. We then used the ring-saw and concrete circular saw, under the direction of a city structural engineer, to cut the B side wall, for later removal. Once the wall was cut, the opening was made by an excavator. We then proceeded to remove debris with chainsaws and hand the material out in a human chain. We eventually used 5 gallon buckets to

Incident Report

Narrative Text	<p>At 0000 hours on Saturday December 3, 2016 we were dispatched to an EMS call. One unit was assigned to this incident. One person responded. We arrived on scene at 0643 hours and cleared at 0643 hours. The incident occurred at On DERBY Ave at INTERNATIONAL, OAKLAND. The local station is ST13. The general description of this property is street or road in commercial area. The primary task(s) performed at the scene by responding personnel were to provide first aid and check for injuries. No mutual/automatic aid was given or received.</p> <p>Alarm number 0085236 has been assigned to this incident.</p> <p>M/32 approached Battalion 2 while on scene of a structure fire at 1305 31st AVE. Pt. complained of burns to fingers and had hands in a styrofoam cup with water. Pt. asked for burn gel. PMP requested via FDC. PMP with pt. care and pt. refused transport. Refusal of care handled by medic crew.</p>

Report of Fire Inspection

Date 1/12/2010

Facility / Site Location

GRISELDA'S SALON

3071 INTERNATIONAL BLVD #B

3071 INTERNATIONAL BLVD STE B

OAKLAND CA 94601

OAKLAND CA

94601-2202

Pursuant to OMC Sec. 15.12, a Commercial inspection was conducted on 1/12/2010 at the site location which found the facility to be **Non-Compliant** with City of Oakland fire regulations. In accordance with CFC 104.5 you are hereby ordered to immediately correct all upon receipt of this notice. Failure to comply with this lawful order may result in a citation to appear in Municipal Court, plus additional fees and civil penalties.

Deficiency	Deficiency Status
Corrective Action	Location
CFC 505.1	
Provide address numbers visible and legible from street and of contrasting color to the background.	Unsatisfactory
CFC 906.1	
Provide one 2-A:10-B:C (4-A:40B:C in F Occ.) extinguisher adjacent to exits. (Additional fire extinguishers shall be installed per CFC Tables 906.1, 906.3(1), and 906.3(2).)	Unsatisfactory

An inspection has been scheduled to determine if you have complied with this order on February 20, 2010 12:00 am. The inspection/permit fees will be invoiced at a later date. If any violations are found during the reinspection, additional inspection fees and penalties will be charged.

Should you have any questions, please call (510) 238-3851

Sincerely,

Liggins, Daryl, Captain
 Oakland Fire Department
