TRUCKS IN WEST OAKLAND- COMMUNITY WORKSHOP #2
Saturday, December 2, 2017
West Oakland Farm Park – City Slicker Farms
2847 Peralta Street, Oakland, CA 94608

Program

I. Meeting Begins @ 10am
   • Welcome & Introductions
   • Overview of meeting
   Facilitator: Surlene Grant, Envirocom Communications Strategies, LLC

II. Background on West Oakland Truck Management Plan (WOTMP)
    Pat McGowan, Senior Planner, City of Oakland

III. Board Shuttles
     All
     • @ Farm entrance on Peralta Street

IV. Tour Begins @ 10:15am
    All
    • See Exhibit A

V. Tour Concludes
   All
   • Return to the Farm Park

VI. Lunch Program Begins @ 12pm
    All
    • Debrief
    • Q&A
    • Next Steps

VII Workshop Concludes @ 1pm
   City & Port representatives will be available to any answer questions

West Oakland Truck Management Plan
Mobile Workshop
to look at issues/problems/concerns
December 2, 2017

Sites to be visited and issues to be discussed

1. Poplar and Union Streets, between 24th and 26th St.
   
   a. **Issue of Concern:** Truck parking on city streets
      i. Why are they parked here?
      ii. Are they serving nearby businesses?
      iii. Is it a problem here?
      iv. Do they think it should be prohibited in this area?
   
   b. **Issue of Concern:** Trucks driving on streets which are prohibited to trucks
      i. Clarify what a “prohibited street” is.
      ii. Here, the “prohibited streets” are Poplar and Union north of West Grand, plus 24th to 32nd St. between Adeline and Peralta. Trucks have been observed driving these streets, presumably to access the truck businesses on the streets.
      iii. Do trucks driving these streets affect you? Your neighbors? The nearby businesses? Effects could include traffic and congestion on adjacent streets, or safety issues such as trucks turning corners too tightly.
      iv. Should these streets have any restrictions or controls to reduce these effects?
      v. Is enforcement important to you in this location?
      vi. Are the truck businesses appropriate land uses here?
      vii. Are there any issues with trucks parking on the streets in this area? If so, is it daytime or nighttime or both?

2. South side of DeFreemery Park, 16th and Poplar St.
   
   a. **Issue of Concern:** Truck parking on city streets, including residential streets (along 16th street on the south side of the park and along Poplar St. on the west side of the Park, from 14th to 18th St.)
   
   b. The community meeting and the truck parking survey identified truck parking in this area as an issue. Have you or your neighbors experienced any issues with truck parking? Is trucking parking more common in the daytime or the nighttime?
c. Do you have any experience seeing trucks using 16th? It is **not** a prohibited street so do they see trucks using it, instead of 14th and 18th? Do you see trucks on 14th and 18th?

d. Do you feel safe crossing 18th St. between the Park, the high school, and the library?

e. Is enforcement important to you in this location?

3. Drive along 7th St.
   a. Describe that only the ends of 7th St. are truck routes. The middle section, west of Union St., in front of the BART station, over to Pine St. is **NOT** a designated truck route, though trucks can drive here if their final destination is here and some overweight trucks can use 7th St.
   b. Do you encounter problems with trucks on this part of 7th Street?
   c. Would better signage help to make this clear?

4. Around Prescott School, on Peralta St.
   a. **Issue of Concern:** The public input received to date shows this area as **NOT** being heavily impacted by trucks, neither driving nor parking.
   b. Do you experience problems here related to trucks driving or parking?

   c. All the streets around here are designated as “prohibited streets.” There is also signage regarding parking restrictions. Do you think these are working? Are there other measures, such as increased enforcement/ticketing, which are helping?

   d. Do you think any of these strategies would work in other areas that have truck parking issues?
Summary of City of Oakland Regulations about Truck Routes and Truck Parking

Prepared by Patricia McGowan, City of Oakland Nov. 30, 2017

What are Truck Routes and Prohibited Streets?
Oakland Municipal Code Chapter 10.52 specifies where commercial vehicles (meaning trucks used to transport goods) can drive and where they are prohibited from driving.

A. Truck Routes
   Section 10.52.070: Through-Truck Route
   Section 10.52.120: Local Truck Routes
   - Covers truck travel between the Bay Bridge and the Oakland-San Leandro border.
   - Specifies certain streets and freeways which must be used by trucks over 20’ in length intended for the transportation of property, including tractor-trucks and trailers, when such trucks are driving within or across the city of Oakland.
   - These routes include specified city streets and freeways.
   - Signs authorizing the use of these streets as truck routes must be in place.
   - These through-truck and local truck routes are shown on the map in BLUE.

B. Prohibited Streets
   Section 10.52.060: Trucks prohibited to use certain streets
   - Commercial trucks over 4.5 tons (which includes most commercial trucks larger than an SUV) are prohibited on the specified streets except for the purpose of loading and unloading. This must be properly sign posted on such streets. This means that such trucks are prohibited from using these specified streets unless they are loading or unloading their truck at a destination located on such a street.
   - The prohibited streets are shown on the map in RED.

C. When can trucks leave the Truck Routes?
   Section 10.52.110: Deviations from through-truck routes
   Section 10.52.120: Deviations from local truck routes
   - Trucks are allowed to deviate from the truck routes provided that:
     - The purpose is to load or unload at their destination
     - Such deviation from the truck route is reasonably necessary
     - Such deviation must be done to have the minimum distance off the truck route.

Where is Truck Parking Prohibited?
Oakland Municipal Code Chapter 10.28 specifies where parking of both cars and trucks is allowed and where it is prohibited.

A. Trucks cannot park in residential districts
   Section 10.28.120: No commercial trucks can park in residential districts
• No truck, tractor, trailer or other commercial vehicle over 10,000 pounds shall park on a public street in a residential district. This means that commercial trucks of a size larger than an SUV cannot park in a residential district, regardless of no signs be posted stating this. Signs are NOT required when it’s a residential district.

B. No parking of unattached trailers in locations where signs are posted
   Section 10.28.160: Unattached trailer parking can be prohibited.
   • Parking of unattached trailers CAN be prohibited if the City Engineer determined that such parking is creating a nuisance, blight or a hazard.
   • Official signs must be posted prohibiting such parking.

C. No parking of trucks in certain areas when designated by City Council
   Section 10.28.140: No parking of commercial vehicles in certain areas
   • No truck, tractor, trailer or other commercial vehicle for more than five hours on a public street if the City Council determines by resolution that such parking is not allowed.
   • Official signs must be posted prohibiting such parking.

D. No parking of cars or trucks on any city street for more than 72 hours
   Section 10.28.030: Using streets to store cars or truck is prohibited.
   • No vehicle can park for more than 72 consecutive hours on any public street in Oakland.
Truck Routes and Prohibited Streets
In and around West Oakland

Blue = truck routes which must be used by through-trucks
Red = prohibited to commercial trucks except when loading/unloading

Refer to Oakland Municipal Code Chapter 10.52
