

Mayor Quan, Councilmember Kalb and City Staff want your input!

Safer Homes through Seismic Retrofits Program Community Forum

Thursday, October 30th, 2014

5:30pm-7:00pm

**City Hall, Hearing Room 1,
1 Frank Ogawa Plaza, Oakland**

With Special Guests

Victoria Inez Salinas, Chief Resilience Officer, City of Oakland

Patrick Otellini, Chief Resilience Officer, City & County of San Francisco

Without the needed precautions in place, the next big earthquake could be Oakland's Hurricane Katrina. Twenty-two thousand (22,000) rental units in Oakland are in the type of building known as "soft story". Soft story buildings are the primary type of structures that collapsed in the Loma Prieta and Northridge earthquakes. This is why tackling those precautions is of the utmost importance.

Join us at a community forum to discuss efforts underway by the City of Oakland to design a seismic retrofit program that reduces displacement and safety risks posed by "soft story" APARTMENT BUILDINGS.

Please contact Melissa Vargas, Community Services Manager, Office of the Mayor at MVargas@OaklandNet.com or (510) 238-7072 with any questions or concerns.
