

NOTES

- (A) On intersection approaches, drop left side bike lane buffer (if present) and use detail 39A to define left side of bike lane for 50' (typical) at minor intersections and in downtown, otherwise 100' (typical).
- (B) At locations where motorists will make right turns from side-streets, taper left buffer stripe over a 35' length.
- (C) At bus stops, drop the buffers and use detail 39A stripes to define both sides of the bike lane.

See Details C-1 and C-2 for cross-section dimensions.
