

# SAMPLE CHARGES FOR MULTIFAMILY TRASH, COMPOST & RECYCLING SERVICES

July 1, 2015 through June 30, 2016

Multifamily buildings are required to subscribe to the minimum weekly Trash service of 20-gallons per unit. Weekly Compost service is included in the Trash charges. There is a required weekly Recycling service charge of \$9.20 per unit per month in addition to the charge for Trash & Compost services. The Sample Minimum Trash Container Combinations table below shows the charges for combinations of Trash containers that meet minimum required weekly Trash service, the monthly charges for the required Recycling service, and total charges for all services.

### Calculating Required Minimum Weekly Trash Service for Your Building:

- 1) Multiply the number of units in the building by twenty (20) gallons.
- 2) Round the total number of gallons down or up to the nearest 100 gallons. Examples: Round 240 gallons down to 200 gallons; Round 250 gallons up to 300 gallons.
- 3) Select a combination of carts or bins in which the total number of gallons is equal to (or greater than) your rounded number. NOTE: One (1) cubic yard equals 200 gallons.

NOTE: Overage Charges may be assessed if Trash does not fit in the Trash container(s) you choose. Contamination Charges may be assessed if Compost or Recycling containers are used for Trash. You must subscribe to adequate Trash service. Evaluate your residents' Trash, Compost and Recycling usage when selecting Trash containers, regardless of required minimum service.

NOTE: You may order any number of Compost and Recycling containers to meet your needs, at no additional cost.

The Sample Minimum Trash Container Combinations table below shows samples of Trash container combinations and charges for once per week service. Other container combinations may be available. Two, three, four and five times per week services are available.
